GREETINGS FROM THE ORGANISING COMMITTEE

Get ready for three days that will redefine how you think, decide, and operate in diabetic foot care.

We proudly invite surgeons, diabetologists, podiatrists, and wound care specialists to the THIRD CHENNAI ADVANCED DIABETIC FOOT AND WOUNDS CONFERENCE – Diabetic Foot Society of India (Tamil Nadu Chapter) 2026, happening on 12th, 13th & 14th June 2026 in Chennai. Powered by the compelling theme “From Evidence to Excellence: Transforming Diabetic Foot Care,” this conference is where textbook knowledge ends and gold-standard practice begins.

This is not another routine conference. This is a high-impact, skill-driven, practice-changing academic battlefield where every session is designed to improve outcomes, prevent amputations, and elevate surgical and medical decision-making.

Over three intensive days, you will experience:

- Advanced decision-making for complex diabetic foot cases
- Interactive workshops that translate directly to wound healing
- Bedside bone biopsies demystified – when, why, and how
- Biofilms decoded – the hidden enemy behind non-healing wounds
- Compression therapy workshops – practical, precise, and outcome-oriented
- Evidence-based protocols you can implement from Day One
- Regenerative medicine in wound care

Hosted by the Dr. R.K. Diabetic Foot and Podiatry Institute and the Rakesh Jhunjunwala Amputation Prevention Center, this conference brings together institutions dedicated to amputation prevention, limb salvage, and excellence in diabetic foot care. Prepare to learn from a powerhouse faculty of national and international masters – surgeons, diabetologists, podiatrists, and researchers who have set benchmarks, written guidelines, and changed the way the world manages diabetic foot disease.

This conference is a true “Sangamam” –

- Knowledge meets Technology
- Experience meets Research
- Present-day practice meets Future-ready innovation

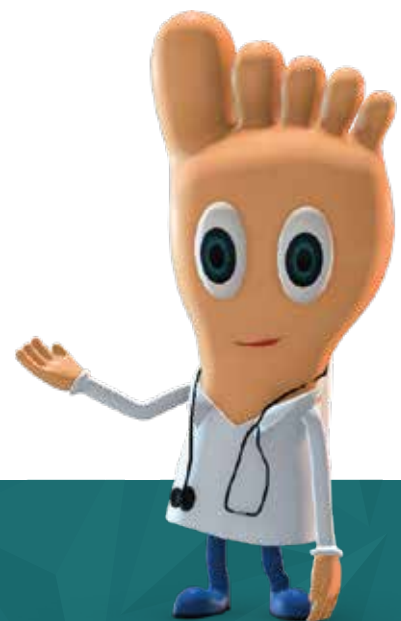

If you are serious about:

- Reducing amputations
- Improving limb salvage
- Mastering complex diabetic foot management

We welcome you all wholeheartedly to this conference.

With Warm Regards

TEAM CHENNAI

TENTATIVE CONFERENCE TOPICS

I Vascular Workshop

- Principles of Compression Therapy
- Understanding Doppler Signals
- Correct Use of Handheld Doppler Devices
- Interpretation of Doppler Waveforms
- Lymphedema Management
- Manual Lymphatic Drainage Techniques

II Dermatology Workshop

- Recognition & Management of Common Foot Skin Disorders
- Nail Disorders

III Biomechanics

- Platform Scan - How to Interpret
- Gait Analysis for the Diabetic Foot Specialist

IV Advanced Wound Modalities

• Hyperbaric Oxygen Therapy (HBOT)

"HBOT in Modern Wound Healing: Enhancing Tissue Oxygenation for Faster Recovery"

• Cold Plasma

"Cold Plasma Therapy: A Novel Antimicrobial and Regenerative Tool in Wound Management"

• Topical Carbon Dioxide Therapy

"Topical CO₂ Therapy: Improving Microcirculation and Accelerating Wound Healing"

• Iirilic (AI-Powered Wound Imaging/Assessment System)

"Iirilic Digital Wound Assessment: Transforming Clinical Decision-Making Through AI"

• GeckoWatch (Wearable Physiological/Wound Monitoring Device)

"GeckoWatch: Continuous Physiological Monitoring for Predictive Wound Care"

• Sudoscan

"Sudoscan in Diabetic Foot Care: Rapid Autonomic Function Assessment for Early Risk Stratification"

V Regenerative Medicine in Diabetic Foot

- Stemcell in Peripheral Arterial Disease (PAD)
- PRP/PRFM in non-healing wounds

VI Imaging Technology

- Reading X-rays of the foot
- Understanding Foot MRI
- Soft Tissue Ultrasound in Foot & Ankle
- Interpreting CT Scan

VII Infection in Diabetic Foot

- Understanding Culture and Sensitivity Reports
- Algorithm for Managing Diabetic Foot Infections
- Newer Antibiotics for Diabetic Foot Infection
- Molecular Genetics - Their Role in Managing DFI
- Bugs - What to Treat & How long?
- Antibiotic Decision Making
- Probe to Bone test
- Deep Tissue Sampling
- Biofilm Management

VIII Diabetes Management for the Wound Care Specialist

- Diabetes for the GPs & Surgeons
- Managing Hypoglycemia
- Continuous Glucose monitoring

IX Weight Loss

- Weight Loss in Diabetic Foot
- Initiating Newer Agents in the Weight Loss Journey
- Nutrition & Weight Loss
- Exercise for Diabetic Foot Patients & Strength Training

TENTATIVE CONFERENCE TOPICS

X Investing for Doctors-Banker's

- Beyond the Clinic: Wealth-Building Strategies and Investment Planning for Doctors

XI Integrated Wellness

- Holistic Approach for Diabetes Management

XII Offloading Workshop - Pressure and Footwear

- Total Contact cast
- Removable Walker Modifications
- Practical offloading
- Felt Offloading
- Custom Footwear Design & Footwear Prescription
- TCC is the gold standard - Yes or No - Debate

XIII Neuropathy

- Diagnosing Neuropathy
- Managing Peripheral Neuropathy

XIV Vascular

- Angiosome - Directed revascularisation
- Endovascular vs Bypass-What is Better, When is it Better-Debate
- No-option Vascular cases
- Transverse tibial transport

XV Relive Surgery Videos

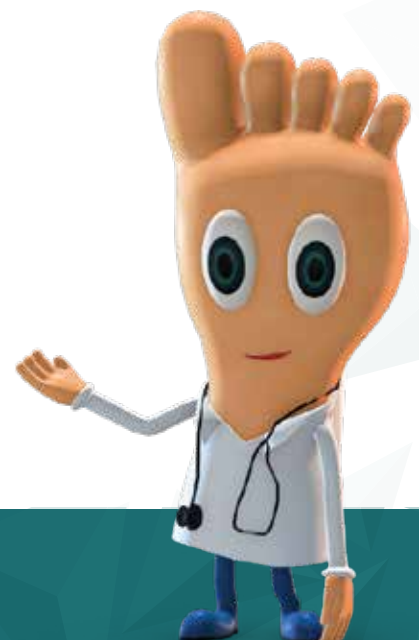

- Managing Complications
- Mistakes in Diabetic Foot Surgery
- Case Based Interactive Sessions
- Local Flaps
- Plantar SSG
- Should all infected ulcers be debrided immediately - Debate

XVI Live Wound Boards

- Ischemic Heal Ulcers
- Infected Charcot foot
- Calcaneal Osteomyelitis
- Failed TMA

Other Topics

- Charcot - Medical vs Surgical Management - Debate
- Examining Foot & Ankle
- Maggot Therapy
- Communication-How to break a bad news
- How to talk to patient and attender
- Medico legal aspects of Diabetic Foot Infections
- Photographing and Documenting Wounds
- Do you require video consents
- Local Flaps in managing DFI
- Mobilising Patients Out of Bed Tricks
- Digital technology Workshop
- AI wound measurements
- Smart phone wound imaging tools
